Subject: RE: Rapid Screening Lab Implementation - Project Plan

Importance: High

Our next staff meeting is scheduled for 6/11. If it can wait until then, it would be preferable to discuss at the staff meeting; however, if not, send electronically. I really do not think anyone will have a problem with it, so go ahead and electronically send it for a more rapid approval.

Subject: Rapid Screening Lab Implementation - Project Plan

Loreen -
Debbie sent me the attached project plan for the implementation phase of the rapid screening lab. You'd indicated that you thought Rick and his staff should review.

Since we don't have a formal process, I had planned to circulate it electronically asking for any feedback within a week (with the understanding that it would be incorporated into our plan unless there was an objection).

Or should it be circulated for discussion at an upcoming RPS staff meeting?

Your thoughts?

-Valerie
